# Enkel och flexibel installation

För in värmekabeln i slangadaptern på dräneringstråget. (För gummitätningen som redan sitter på kabeln till termostaten.) Dra igenom hela kabeln i adaptern, peta kabeln ände till rätta med din mejsel i början. Trä slangklämman på slangen. För draglinan genom slangen. Tejpa fast värmekabeln i draglinan (2–3 tejpningar nära kabeländen, med en dm mellanrum). Smörj kabeländen och slangens öppning med lite diskmedel. Dra försiktigt kabeln genom slangen. Ta bort tejpen när den är igenom.
